

# INNOVATIVE, VERSATILE, HIGH-PERFORMANCE POLYMERS PRODUCTS AND RECYCLED RUBBER TECHNOLOGY.

## ACCELLA PRODUCT APPLICATIONS

Accella is a major producer of advanced polyurethanes for a wide variety of industries and applications. Our experience in designing and producing custom materials are what differentiates us in the industry. Accella Performance Products are of the highest quality and perform consistently from laboratory to the field. We strive to meet your installers' needs from design to application.

### FILTERS & AUTOMOTIVE

We work with the largest filter manufacturers in the world to improve the quality and performance of many types of filters, including air and oil filters for automotive applications.

### ELECTRONICS & INDUSTRIAL

Our products combine outstanding abrasion and chemical resistance with excellent adhesion to most substrates.

### SPORTS & RECREATION

Our Tru-Motion branded surfacing products can be found across the country, in schools, colleges, as well as recreational sports halls and gyms. In addition, our safe surface materials are known to be the best in the industry for playground installations.

### FLOORING

Accella has extensive experience in all types of flooring and surfacing products. From the front doormat to the hardwood flooring or carpeting throughout your home, Accella products lead the way.

### BUILDING, CONSTRUCTION & LANDSCAPING

Our polyurethane elastomers are the backbone of tooling that creates concrete form liners, stamping tools, faux rocks and waterfalls, and pavers and ponds.

*For a complete and comprehensive review of your next project, please contact us for a consultation. We are dedicated to supporting your business needs for high-end, custom designed polyurethane material products.*

## ACCELLA PERFORMANCE PRODUCTS FOR FLOORING & SURFACING APPLICATIONS

Accella offers a myriad of diverse polyurethane products and can customize a formula especially for your application needs. We have the ability to design a formulation and provide the rapid on-site customer support that you need.

### Adhesives & Binders

Moisture-cured urethane binders are engineered to provide a wide range of characteristics, including chemical-resistant types and light stable aliphatic polyurethanes.

- Running Tracks
- Playground Surfaces
- Carpet Pad
- Tile Underlayment

### Polyurethane Elastomers

Available in a wide range for physical and chemical characteristics, and ranging in a variety of hardness.

- Athletic Flooring
- Playground Surfaces

### Polyurethane Coatings

Available in a wide range to meet your exact specification and application requirements.

- Athletic and Playground Safety Surfaces
- Flooring Primers
- Strippable Coatings

 **TRU-MOTION™**

*Tru-Motion is a custom line of MarChem Polyurethane Systems products for indoor multi-purpose athletic surfaces, outdoor running tracks, and safety surfaces.*

# A COMPANY OF INNOVATION, TECHNOLOGY, AND EXPERIENCE

With origins dating back to the early 1960's in the polyurethane and rubber industry (Dash Multi-Corp and MarChem Polyurethanes), a new company has developed to establish a formidable position as a leading manufacturer in the polyurethane industry. Accella is now the face for many products that you are familiar with, including our MarChem and Ultimate RB Rubber business units.

The new name reflects the responsiveness, technical knowledge, innovation, and manufacturing strengths of all of our businesses combined.

**Accella Performance Materials**  
is a group of chemical and material  
companies that combine the best of its  
people, technology and manufacturing  
processes to drive innovation and  
sustainable solutions for our customers.

**INNOVATION. TECHNOLOGY. EXPERIENCE**
