

CHEMISTRY for Outdoor Athletic Surfacing

Tru-Motion H3738 aromatic structural spray coating has been formulated for improved coverage on outdoor track installations. In addition to outstanding coverage and hiding, this new formulation has excellent adhesion to crumb rubber and provides unparalleled wear and weather resistance for outdoor running track surfaces.

H3738 is a 99% + solids, VOC free, moisture cured binder that is used with rubber granules to produce a structural spray coating. It is installer-friendly with enhanced coverage for ease of installation. This product has a worklife

that is suitable for elevated temperatures and humidity, and produces a coating that wears well with minimum color change from outdoor exposure.

The H3738 does not contain TDI, solvents, mercury, or other heavy metals that may make waste disposal difficult.
