 **TRU-MOTION™**  
An Accella Brand

Tru-Motion is a custom line of Accella Polyurethane Systems products for indoor multi-purpose athletic surfaces, outdoor running tracks, and playground safety surfaces. Combining years of advanced technical expertise, our chemists deliver state-of-the-art products that perform consistently from the laboratory to each on-site installation.

#### **TRU-MOTION PRODUCTS INCLUDE:**

- Single-component, moisture cured binders – for outdoor running tracks and poured-in-place safety surfaces
- Two-component poured elastomer systems – for indoor multi-purpose flooring and outdoor running tracks
- Single-component and two-component coatings – for running track structural sprays and indoor multi-purpose flooring topcoats and line paints

Our experts can evaluate your material requirements, determine the best products for your application, and deliver your order on time and on budget. As proud members of ASBA (American Sports Builders Association) and IPEMA (International Playground Manufacturers Association), we're committed to producing superior athletic and recreational surfacing chemistry and the most reliable and installation friendly product for every customer.

# INDOOR MULTI-PURPOSE ATHLETIC SURFACES

Indoor multi-purpose athletic surfaces require a unique combination of materials for consistent athletic performance as well as athlete safety. From the base mat adhesive and pore sealer, to the self-leveling elastomers and final game line paint, our indoor systems contain environmentally friendly components while still maintaining a high level of durability with minimal maintenance.

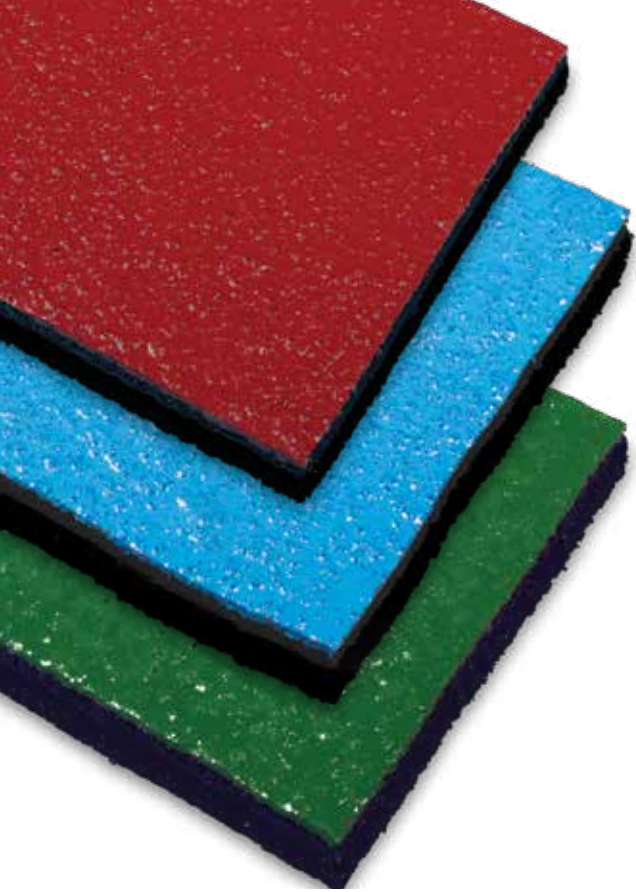

For specific IAAF certification requirements, please visit Tru-Motion on our website at [www.accelapolyurethane.com](http://www.accelapolyurethane.com)

Tru-Motion indoor multi-purpose athletic surfacing materials are designed to provide the highest levels of surface performance and have long-wearing capabilities with low maintenance requirements. With 20 plus years of experience in water-based top coat and game line paint technology, Tru-Motion has earned the reputation among installers as the preferred choice for indoor surfaces.

- Eco-friendly, self-leveling, mercury-free elastomer systems with solvent-free top coats.
- Spike resistant and high durometer surfaces available for special applications such as roller blading and bleacher support.
- Flexibility to choose from the largest available variety of custom formulations, design, and coloring.

- Tru-motion one and two-part polyurethane structural sprays provide unparalleled ease of installation and coverage, while providing excellent wear and weather resistance.
- Aliphatic structural sprays are available where a UV stable surface is required.
- Tru-motion full-pour, mercury-free elastomer systems are also available for the full range of solid elastomer applications.

## OUTDOOR RUNNING TRACKS

Our experienced chemists, who are devoted to working on new technologies for ultimate performance in running tracks, have developed custom materials for your specific outdoor running track needs. Tru-Motion Outdoor Running Track products are durable, performance driven, and installer friendly. With maximum installer safety in mind, Accella offers a line of solvent-free track coatings and mercury-free full-pour elastomer systems that provide unsurpassed performance.

Tru-Motion single-component, moisture cured polyurethane binders are ideally suited to provide outstanding adhesion and durability for the crumb rubber base layer. These binders are available in both TDI and TDI-free versions, each designed to meet specific end user requirements and installation parameters.

## PLAYGROUND SAFETY SURFACES

By utilizing our wide range of experience and technology with polyurethane binders, EPDM, and crumb rubber applications, we offer an array of specially formulated products exclusively for playground and safety surfaces. Tru-Motion Playground Safety Surfaces products are mixed and poured on-site, resulting in a highly durable and weather-resistant surface. Our products offer enhanced color fastness and ease of installation for rubberized playground surfaces. We can also design and customize a product unique to your application.

- Specialty binders for applications such as water parks and pool surrounds.
- Binders specifically designed for climatic variations in temperature and humidity.
- Aliphatic binders for color-fast, non-yellowing EPDM surfaces.
- Repair and refinishing systems

# MANUFACTURING CAPABILITIES AND DELIVERY

Tru-Motion products are backed by Accella Polyurethane Systems' extensive efforts in research, engineering, technology and testing to assure a high-quality finish on every athletic track (outdoor or indoor), gym floor, and playground safety surfacing project. Utilizing ISO 9001:2000 registered facilities, Accella supplies the right polyurethane tailored to your specific needs.

We have a variety of production processes and equipment available to manufacture varying lot sizes quickly and cost-effectively. This extensive capacity and flexibility also allows us to manufacture and deliver your order to specification and quantity on very short notice.

We utilize our own fleet of dedicated company-owned tankers, trucks, and trailers to assure your order arrives on time. Whatever you need, Accella Polyurethane Systems' materials are available in all sizes; from pail and drum, to totes and tanker loads. Accella has production facilities located throughout the US, and we are positioned to deliver our products efficiently, cost-effectively and on time.

## PRODUCT QUALITY

With state-of-the-art laboratory equipment at all locations, we have the ability to provide rapid on-site customer support and analysis. This technology allows our specialists to evaluate your material requirements and determine how to improve your product and deliver your order on time, every time.

Our diverse equipment can be utilized to manufacture a custom compound or formulation and produce batches as small as one drum or as large as a tanker load. With more than 40 different mixers, 25 different reactors, and milling and grinding equipment in capacities ranging from a few gallons to over 10,000 gallons, Accella

Polyurethane Systems has the capacity for any job. Our custom polyurethane systems are designed to work with your application specifications and solve for your needs.

## OUR PEOPLE

Accella employs some of the best minds in chemistry and chemical engineering. We have well over 250 combined years of experience developing custom chemical compounds and formulations for a diverse group of customers, products and markets.

### OUR STAFF INCLUDES:

- Degreed Chemists
- R&D Scientists
- Quality Control Scientists & Technicians
- Product Development / Technical Development Staff
- Process Engineering Staff
- Expertise in Regulatory Affairs

### WHO CAN HELP YOU WITH:

- Regulatory issues
- Designing a special formula
- Mixing your special formula
- Providing standard, off-the-shelf products
- Bulk orders
